

Technical Data Sheet

Niruadd-W25

White Masterbatch

Nirumand Polymer

Nirumand Polymer Co.
Filled & Reinforced Engineering Plastics

Product Description

Niruadd-W25 is an white-Blueish colour masterbatch which is contained up to 25% pigment. This masterbatch is applicable in good quality specialty applications such as film coating, extrusion coating, molding for food contact, medical devices and products for photographic applications. This masterbatch has an excellent dispersion which is critical for an appropriate and homogeneous colour distribution of finished products.

General Properties

Material Status	•Commercial: Active
Forms	•Pellets
Processing Method	•Blown film, Cast film, Injection molding
Appearance	•white-Blue

Physical Properties	Value	Unit	Test Method
Density	1.97	gr/cm ³	ISO 1183
Filler Content	79	%	ISO 3451/1
Pigment Content	25	%	-
Dispersion	OK	-	Internal
Moisture Content	< 0.25	%	ASTM D570

Usage

Niruadd-W25 can be added from 1 to 5% during processing of polymer products. The addition level will vary depending on the application of product.

Special characteristics

Excellent dispersion

Formulations in polyolefins and engineering resins

Easy to incorporate

Improve whiteness of recycled polymers

Glossy surface

It gives smooth and glossy surface of film
